Portfolio: https://allenwrinseportfolio.netlify.app/#home

SUMMARY

UI/UX designer with experience in creating intuitive and user-centered digital experiences using Figma. Skilled in developing wireframes and prototypes that focus on usability, visual clarity, and effective interface design. Possesses knowledge in hardware maintenance and system troubleshooting, ensuring devices and systems operate efficiently and reliably. Combines creativity, problem-solving skills, and technical awareness to deliver structured, user-friendly, and dependable solutions.

EXPERIENCE

Portfolio Website

Laravel | HTML | CSS | MySQL - Human Hive System March 2024

Human Hive – Web-based HR management system enabling HR staff to add, organize, and manage employee records through a centralized dashboard.

Laravel | HTML | CSS | MySQL - GKB POS System March 2024

A web-based POS system built with HTML, CSS, JavaScript, PHP, and MySQL that allows shop owners to process customer orders and track total sales through a centralized dashboard.

Figma | Dart | Flutter | Supabase - Smart-Finder Application August 2025

Designed and developed a mobile application for boarding house and apartment rentals, allowing renters to find available properties and landlords to post and manage listings. Designed the user interface in Figma, developed the app using Dart and Flutter, and used Supabase for backend support and data management.

ASP.NET MVC | C# | SQL Server - Book Haven October 2025

Developed a web-based system for managing book inventory, borrowing, returns, and user records with admin controls and tracking features.
